1-15 GAL Stop Nut	2 or 4	AI-508	AI-508-SS	-	-	1/2" -13 UN	-

Additional options available: Teflon Coated (-T), Rubber Coated (-RUB).
Custom sizes available. Please contact us for more details.

All mounting U-bolts are sold in kit form with elastic stop nuts and washers. All standard units are zinc-plated carbon steel. Rubber coated units are carbon or stainless steel, shrunk-fit with buna-nitrile rubber. DuPont™ Teflon® coated units are carbon steel with Teflon spray coating.

Dimensions are nominal and may vary within manufacturing tolerances. It is recommended that you have the U-bolt on-hand when drilling mounting plate. U-bolts are not designed to work in conjunction with our mounting bases.

These u-bolts are mounting fasteners only and are not intended to support the entire weight of an accumulator. Contact us for specifications.
